Air Force Avionics Laboratory
Wright Patterson Air Force Base
Dayton, Ohio 45433

Declass Review by NGA.

ATTENTION: [REDACTED]
Photographic Branch
Reconnaissance Division AVRP

SUBJECT: Funding Information on Air Force Briefing Print Enlargers

1. The updated information requested regarding existing funds and current pricing of Briefing Print Enlarger (BPE) components is as follows:

Original Air Force Funding (3 BPE's) [REDACTED]
Estimated Cost (3 BPE's @ [REDACTED]) [REDACTED]
Three spare parts kits [REDACTED]

Balance [REDACTED]

2. It now appears as though there will be an underrun of [REDACTED] on the contract or [REDACTED] per instrument, adding an additional [REDACTED] to the above balance of Air Force funds.

3. The high magnification lenses are now estimated to be [REDACTED] per set if ordered in single sets; [REDACTED] for three sets; [REDACTED] for four sets with delivery eight months after receipt of order. Installation is not included in the above figures (one day by [REDACTED] engineer), but can be negotiated.

4. Unit prices for BPE's are: one unit [REDACTED] two units [REDACTED]. These figures can probably be negotiated downward, especially on a multiple purchase, since the original seven units are costing around [REDACTED] each.

5. It is recommended that the Air Force requirements for high magnification lenses or additional units be made known as soon as possible for inclusion under the existing contract.
